

Communication

Date	4 July 2026
Team ID	XXXXXX
Project Name	Opti crop-Smart Agricultural Production Optimization Engine"
Maximum Marks	1 Mark

Communication Plan:

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	WhatsApp / Discord	All Team Members	Share daily progress on tasks, outline what to work on next, and identify immediate blockers.
2	Progress Update	Weekly	Zoom / Google Meet	All Team Members	Review weekly milestone progress against project Epics (EDA, Pre-processing, Model building).
3	Issue / Bug Discussion	As Needed	GitHub Issues / Slack	All Team Members	Troubleshoot unexpected code errors, library version conflicts, or data processing bugs.
4	Stakeholder Review	Bi-Weekly	SkillWallet Portal / Email	All Team Members	Present completed project phases, gather feedback, and ensure alignment with requirements.
5	Final Demo Rehearsal	Once	Google Meet	All Team Members	Practice the final application walkthrough, test presentation flow, and verify the live Flask app deployment.
6					

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Misaligned Schedule & Timelines: Team members had conflicting schedules, making it difficult to coordinate long meetings for tasks like exploratory data analysis (EDA)	Asynchronous Updates: Shifted to text-based daily standups on Discord and utilized shared Google Colab/Jupyter Notebooks so members could contribute at different times.
2	Merge Conflicts & Code Overwrites: Multiple members working on the Flask application and ML scripts simultaneously caused code integration issues.	Git Branching Strategy: Implemented a strict GitHub workflow where team members worked on feature-specific branches and conducted peer reviews before merging into the main branch.
3	Delayed Feedback from Stakeholders: Waiting for bi-weekly reviews left the team uncertain about whether the data pre-processing strategy met expectations.	Proactive Milestone Logging: Used the SkillWallet platform actively to log interim progress updates and tag mentors for quick, micro-feedback on critical architectural decisions.
